REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance.

Regarding claim 24 and its dependent claims, the combination of steps set forth in the claim is not anticipated or deemed to be obvious in view of the prior art. In particular, the prior art does not teach or suggest the step of "adjusting a transverse distance between each jaw pair of said plurality of jaw pairs around a circumference of the drum while maintaining said pitch length between circumferentially adjacent jaw pairs" (emphasis added). This critical step allows the method to be performed in which containers of first and second diameters are respectively packaged using different first and second carriers in a carrier applying machine including a drum with a plurality of jaw pairs, with each jaw pair spaced at a pitch length from a circumferentially adjacent jaw pair -- that is, a single machine can be adjusted to accommodate different carriers without having to change the pitch length of the adjacent jaw pairs.

Regarding claim 31 and its dependent claims, the combination of steps set forth in the claim is not anticipated or deemed to be obvious in view of the prior art. In particular, the prior art does not teach or suggest the step of "adjusting a transverse distance between each jaw pair of said plurality of jaw pairs around a circumference of the drum while maintaining said first length" (emphasis added). This critical step allows the method to be performed in which containers of first and second diameters are respectively packaged using different first and second carriers in a carrier applying machine including a drum with a plurality of jaw pairs, with each jaw pair spaced at a first length from a circumferentially adjacent jaw pair -- that is, a single machine can be

adjusted to accommodate different carriers without having to change the length between the adjacent jaw pairs.

Regarding claim 38 and its dependent claim, the combination of steps set forth in the claim is not anticipated or deemed to be obvious in view of the prior art. In particular, the step of "adjusting said applying machine to accommodate a second carrier having a same pitch length as said first carrier" is not taught or suggested by the prior art. This critical step allows the method to be performed in which containers having a first and second diameter are respectively packaged using the necessarily different first and second carriers in a carrier applying machine in which the pitch length of the necessarily different first and second carriers is the same.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The declaration of Mr. William Weaver under 37 CFR 1.132 filed 8 February 2005 is sufficient to overcome the various rejections of claims 24-39 based upon Cervantes et al. (**US 6,170,225**), Krogman et al. (**US 5,383,321**), Odum et al. (**US 6,055,791**), and Fisher (**US 3,044,230**) set forth in the Office action mailed 27 May 2004.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references listed on the attached form (PTO-892) are cited

to show carriers and their application. All are cited as being of interest and to show the state of the prior art.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen F. Gerrity whose telephone number is (571) 272-4460. The examiner can normally be reached on Monday - Friday from 5:30 - 2:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi Rada can be reached on (571) 272-4467. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
